

Why English Language Laboratory Systems ?

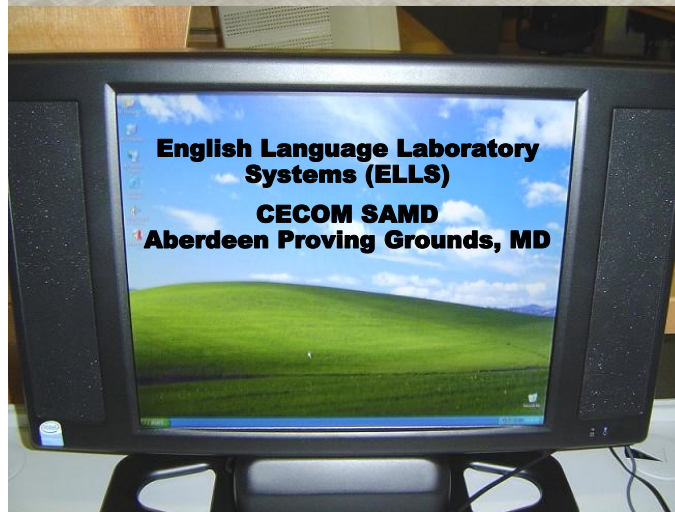

In order for your military to be trained on US Weapon Systems, they must have an acceptable English language proficiency. English Language Laboratory Systems are complimentary to the DLIELC English Language Training Program (ELTP).

System Types:

- Audio Active Language Laboratory with optional Audio/Video kits- "turn key" system with instructors computer and student consoles
- Training Multimedia Language Laboratory – Full suite with instructor and student computers, desks with fully interoperable system

Photo: Instructor Console—Dual Screen System with Analog-to-Digital converter.

OBTAINING LANGUAGE LABORATORY VIA IMET

1. Coordinate with DLI ELC and submit DD2964 form to request ELTP support and to request ELLS approval. CECOM will work with submitting POC/organization to suggest the size and type of English Language Laboratory System the country requires. CECOM will verify with country lead to ensure the intended ELLS will be installed can technologically support the type of English Language Laboratory System selected. Parties will ensure building/room in which the English Language Laboratory System will be installed has the necessary power and environmental protection (HVAC) required to support the English Language Laboratory System equipment/hardware. Consult the CECOM POCs for additional information. This determination may require a site survey and appropriate funding to CECOM.

3. Program an English Language Laboratory System with Security Assistance Training Field Activity (SATFA) as a dollar line (cost of the English Language Laboratory System) in your Army IMET program using the MASL ID TABLE. Inform SATFA what is the host nation requirement. FOR EXAMPLE: "Country requires a 10 position, AALL". The MASL ID for English Language Laboratory Systems is dependent upon what you order. In the example above, the MASL ID is "BAALL10" for the English Language Laboratory System. Check Training Management System (TMS) for other Military Articles Services List (MASL) IDs; use the English Language Laboratory System MASL table on the next page as a guide.

4. Program Packing, Crating, Handling, and Transportation (PCHT) using MASL ID "BOOPCHT". PCHT is required to pack and ship the English Language Laboratory System to country. The PCHT cost varies by destination and the weight of the English Language Laboratory System or equipment programmed. The cost for PCHT must be provided by CECOM POCs. Policy is to air ship English Language Laboratory Systems into country. If it is not possible to ship an English Language Laboratory System via air the Security Assistance Officer (SAO) must advise SATFA, USASAC and CECOM of the preferred shipping method.

5. Program an English Language Laboratory System installation through SATFA. The installation should be programmed in the IMET FY in which you expect the English Language Laboratory System to be installed in your country. Use MASL ID B307010 for installation programming. Cost for an installation team depends upon the requirement. Currently, Tobyhanna Army Depot personnel are performing English Language Laboratory System installations. The exact cost will vary from country to country, an installation quote should be obtained from CECOM POCs.

English Language Laboratory

Inquiries regarding the ordering of English Language Laboratory (ELL) Systems should be addressed to Communications Electronics Command, Security Assistance Management Directorate (CECOM SAMD) point of contact (POC) Jo Ortiz, Program Manager, IMET ELLS; joseph.r.ortiz.civ@mail.mil or Tel: (443)395-6929 at the U.S. Army Communications Electronics Command, Security Assistance Management Directorate, Aberdeen Proving Grounds, MD.

This pricing and information brochure provides current FY IMET English Language Laboratory Systems (ELLS) and associated equipment information/pricing. *CECOM SAMD POC will provide rough order of magnitude (ROM) cost information for English Language Laboratory systems (hardware/equipment), transportation (PCHT), lab maintainer training, site surveys, and installations (labor).

FY21 Price List (TBD)

Audio Active Language Lab (AALL):	\$23,000
5 Pos. Audio Active Language Lab	\$36,000
10 Pos. Audio Active Language Lab	\$46,000
15 Pos. Audio Active Language Lab	\$44,000
20 Pos. Audio Active Language Lab	\$52,000
25 Pos. Audio Active Language Lab	\$59,000

ELLS Maintainer Training

1-10 Trainees (one instructor) \$5,100

Training Multimedia Language Laboratory (TMLL):

5 Pos. Training Multimedia Language Lab	\$23,000
10 Pos. Training Multimedia Language Lab	\$36,000
15 Pos. Training Multimedia Language Lab	\$46,000
20 Pos. Training Multimedia Language Lab	\$61,000
25 Pos. Training Multimedia Language Lab	\$75,000
30 Pos. Training Multimedia Language Lab	\$88,000

BAVKIT1 (AV KIT)	\$2,500
BLLRUPS (Uninterruptible Power Supply - UPS)	\$200
B307010 (Installation/Site Survey/Train/Repair)	Request ROM
B00PCHT (Package Crating Handling and Transportation)	Request ROM
BLAB000 (use for individual Computer replacement requests & when programming, input on the "Alternate Line Description" what it's for: Computer (\$\$k), Keyboards (\$\$), Headphones (\$\$), Mouse (\$\$) etc.) till we build new TMSALS for each of these outliers	Other Labs (can be used for programming MISC items)

<— Please read all info on brochure —>

Language Lab purchases made using IMET funding must be approved by DLI. DLI will complete a survey and provide guidance about how to best implement an English Language Training Program (ELTP).

On a case by case basis, CECOM may require a separate site survey for Language Laboratory purchases. The CECOM site survey is meant to ensure that the host nation has suitable infrastructure to support the lab they would like to purchase. During a survey, CECOM can also assess Language Labs in the host nation for potential repair or replacement. A survey provides an opportunity to have an open dialogue with the country about software/courseware, maintenance, sustainment, and the role that Labs will play in the English Training environment. CECOM can provide quotes upon request for the cost of technical evaluations/ site surveys.
